DETAILED ACTION

Claim Objections

1. Claim 1 objected to because of the following informalities: Line 9, "stations that is" must be changed to – station that is – or – stations that are --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 20 and 22-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Owen (USP 6069880).

Regarding claim 20, Owen discloses a method of monitoring overhead information from non-serving sectors comprising waking up a designated period of time earlier than an assigned slot to monitor a common channel transmitted by a non-serving sector to obtain location information (Col. 7, lines 30-40, the receiver tunes to a non assigned slot for monitoring the page channel to receive a overhead message from the neighbored base stations before the assigned slot, see col. 4, lines 57-62); and monitoring additional common channels transmitted by other non-serving sectors as time permits before the next assigned slot (Col. 7, lines 30-40, receiver monitors the neighbored stations during a duration of at least one non-assigned slot before next assigned slot in slotted mode).

Art Unit: 2616

Regarding claim 22, Owen discloses storing the location information obtained from the common channels in a database (Col. 3, lines 16-25, Table II).

Regarding claim 23, Owen discloses accessing the database to determine location information of the non serving sectors (Col. 3, lines 16-25, Table II, the mobile accesses the table for obtaining the PN offset of the neighbored base stations).

Allowable Subject Matter

4. Claims 1, 3-6, 24, 26-30 and 32-35 are allowed.
5. Claim 21 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven HD Nguyen whose telephone number is (571) 272-3159. The examiner can normally be reached on 8-5.
